# JOIN THE FIGHT AGAINST COVID-19
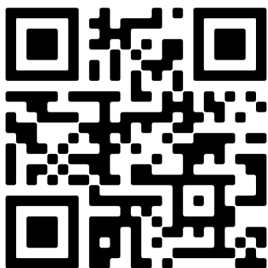

**HEALTH CHECK**

The Bank of Hawaii Health Check App can help you protect your employees and customers by:

- **Streamlining** your COVID-19 screening processes
- **Minimizing** the risk of exposure to you, your employees, and the community
- **Helping** your employees understand their role in keeping our community safe

The Health Check App is a quick, 3 question survey to determine if it's safe for your employee to come to work.

While the app does not detect COVID-19, it serves as an added layer of protection by identifying individuals who may be exhibiting symptoms, or who may have been exposed or potentially exposed to COVID-19 to perform a self-assessment before they come to work. Check out the app for yourself!

**Questions**

Have you or someone you've been in contact with had a fever, cough, shortness of breath, difficulty breathing, chills, muscle pain, sore throat, or new loss of taste or smell that cannot be attributed to another health condition in the past 2-14 days?

YES NO

Have you had contact with a person known to be infected, potentially infected, or exposed to someone infected with COVID-19 within the previous 14 days?

YES NO

Have you or someone you've been in contact with traveled domestically or internationally in the last 14 days?

YES NO

By tapping "NEXT," submitting this questionnaire and/or reporting to work onsite, I certify that my responses are true and correct and that my employer has authorized the use of this app. I understand that any untruthful and/or inaccurate responses may lead to disciplinary action.

## TIPS FOR USING THE HEALTH CHECK APP WITH YOUR BUSINESS

1. **Pair the Health Check App with a Temperature Check each time an employee enters the premises**
   Make sure you know who will be responsible, each day, for checking the results and taking temperatures. This will make it easier for your employees to understand the process.

2. **Ask your employees to complete the questionnaire before they arrive**
   This will make the screening process faster and easier.

3. **Define a plan for when an employee's questionnaire results or temperature deem it unsafe for them to work**
   Having a clear plan to continue operations while allowing employees to go home when appropriate will help improve employee morale and protect our community.
